

June 22- 24, 2009 San Francisco, California USA

Guidelines for Contributing Papers Proceeding to the 3rd International Congress of Nanobio & Nanomedicine 2009

1. Manuscripts should be typewritten and submitted in the form of a computer file plus print-out. We ask for a manuscript of at least 3,000 words and no more than 4,000 words.
2. The printed pages should be of letter size (8.5 x 11 inches) of text typed in font of 10 points of Arial or 12 points of Times New Roman or equivalent; double spacing throughout, one-inch margins.
3. The printed pages should be numbered in the bottom right hand-side.
4. Manuscripts should be submitted in both Microsoft Word for Windows format and PDF format, version 5.0 or later.
5. Original illustrations are to be delivered together with the manuscript in final form for printing. All illustrations must be numbered clearly. All captions are to be added on a separate sheet, at the end of the article.
6. Illustrations can be in black on white or in color.
7. Illustrations may also be delivered in the form of a TIFF or a PDF format.
8. Please add your work address or home address, fax number, phone number and e-mail address on a separate sheet.
9. Please email your manuscript in both Word and PDF files to proceeding@ianano.org by June 12, 2009.

Organization of the Manuscript

Manuscript is to be arranged in the following order:

- **Title Page:** Contain names of all authors and their complete mailing addresses and email addresses to whom all correspondence about the manuscript will be sent.
- **Title**
 - Author(s), and complete name(s) of institution(s).
 - Short and informative as possible.
 - Should not exceed two printed lines.
- **Abstract/Summary:** Should succinctly and clearly describe the major findings reported in the manuscript and not to exceed 200 words.
- **Introduction:** Presents the purpose of the studies reported and should not be an extensive review of the literature nor, in general, exceed two typed pages.
- **Experimental Methods:** A concise description of experimental methods and test procedures.
- **Results:** A reader should gain a clear picture of the work with sufficient subheadings to make clear how the work was organized and what the key questions being addressed.
- **Discussion:** Concise and focused on the interpretation of the results.
- **References:** References in the text should be cited as follows: two authors, Smith and Jones, 1996; three or more authors, Smith et al., 1996. References to papers by the same author(s) in the same year should be distinguished in the text and the reference list by the letters a, b, etc. (e.g. 1996a or 1996a, b). References for journals and books should be in the following styles:

MacDonald, G. M., Steenhuis, J. J., and Barry, B. A. (1995) J. Biol. Chem. 270, 8420-8428.
Sambrook, J., Fritsch, E. F., and Maniatis, T. (1989) Molecular Cloning: A Laboratory Manual, 2nd Ed., Cold Spring Harbor Laboratory, Cold Spring Harbor, NY.
